Kiosk™ Tower 5

Removable Media Security Kiosk

Stop breaches at the point of entry and help your organization mitigate removable media threats and meet compliance in one easy-to-use appliance. The MetaDefender Kiosk Tower supports a great number of built-in media types while establishing a presence to form a strong culture of cybersecurity in your lab, facility, plant, or entry way, best protecting your assets and perimeter from the threats of peripheral media.

Key Features

Advanced Threat Detection

Quickly scan files with 30+ leading anti-malware engines and detect over 99% of known malware.

Country of Origin Check

Identify restricted countries and vendors to block unauthorized access and ensure data compliance.

File-based Vulnerability Assessment

Uncover vulnerabilities in installers, binaries, or applications before installation to plug any security holes.

File Storage & Data Diode

Integrates seamlessly with local, network, or cloud storage, MetaDefender Managed File Transfer, NetWall, and best-in-class data diode providers for secure data transfer and storage.

MetaDefender Endpoint Validation

Validate digital signatures every time media is inserted into a device, blocking unscanned media from accessing your environment.

Supports Common Media Types

USBs, memory cards, optical discs, and floppy.

Privacy and Confidentiality Protection with Proactive DLP

Detect and block sensitive data and personally identifiable information (PII).

Neutralize and Regenerate Suspicious Files

Remove potentially malicious code from various file types and regenerate safe-to-use content with Deep CDR.

Scan Encrypted Drives

Comprehensively scan and sanitize a variety of encrypted drives.

Multiple File System & Virtual Disk Support

FAT, NTFS, Ext, HFS+ & APFS; VHD & VMDK.

Secure Erase

Wipe portable media completely clean, before loading approved content.

Central Management

Simplify Kiosk management in the cloud and on-premises.
